GLOBAL CIVIL & MINING

www.globalcivilandmining.com

4 Dampier Road, Welshpool WA 6106

Kane Blackburn, Managing Director
Damian Nice, Operations Manager

Phone: 08 9258 3900
Email: info@globalsm.com.au

Global Civil & Mining (GCM) is Australia's leading surface miner contractor and has continually been at the forefront of surface miner technology development in the mining and civil construction industries for nearly two decades. GCM's extensive fleet of surface miners located around Australia and experienced personnel will add significant value to any mining or earthworks project. A GCM surface miner undertakes drill & blast, crushing and loading operations all in the one machine. Other unique benefits of a GCM surface miner solution include safe operation near sensitive structures including heritage sites, consistent production of a milled material suitable for road building, engineering fill or mine plant feed, accurate excavation to design levels eliminating final trimming earthworks, replacing primary crushing and in some circumstances secondary crushing in mine plant design, and high production. A GCM surface miner solution can provide an immediate start-up and lower cost operation, with significant safety and environmental benefits to mining and civil operations both in Australia and around the world.

Prequalifications, certifications, specialised capabilities: Global Civil & Mining is certified to ISO 9001 Quality Management System, ISO 14001 Environmental Management System and ISO 45001 Occupational Health and Safety Management System. Capabilities include bulk and selective mining; direct mine plant feed; road and rail development; winning material from borrow pits; mine civil infrastructure including haul roads and stormwater drainage; subdivisional work; bulk earthworks; services installation; trenching; and tunnelling.

RC "Reinforced Concrete" Construction are a Western Australian based multi-disciplined construction company with over 25 years of industry experience working on various projects within the commercial, civil, mining and LNG sectors in Australia. Having previously held key positions on several high-profile projects of varying complexity with compressed schedules and stringent budgets, we understand the ongoing challenges our clients face. We at RC Construction are committed to providing a flexible, pro-active approach, cost effective solution to each client whilst keeping safety and quality a priority. Our motivated team led by experienced construction managers and senior project engineers prides itself on being both reliable and efficient in its operations.

Our sister company GRC Indigenous Construction is a majority Aboriginal - owned contracting business who also deliver concrete construction to the Resource, Infrastructure and Energy Sectors. GRC Indigenous Construction is inspired by the need for new and creative ways for designing and implementing improved "closing the gap" initiatives. By creating new business engagement opportunities for Aboriginal businesses, GRC aspires to make a difference in the way Aboriginal businesses are viewed, understood, and engaged. Our professional approach is always focused on delivering the best value for money to our clients. Our values of trust, respect and reciprocity means you can rely on us for quality and value innovation across all aspects of how and what we do, to get business done effectively and efficiently.

Prequalifications, certifications, specialised capabilities: Experienced in the construction of structural foundations, RC framework, primary and secondary crushers, LNG tanks, retaining walls, RC walls columns and beams, commercial slabs, culverts, bridges and pre-cast structures. Certified Systems to ISO9001 (Quality), ISO 14001 (Environment) and OHSAS 18001, AS/NZS 4801, ISO 45001 (Safety).

Red Dust Holdings (RDH) was born in the dirt and dust of the Pilbara and has developed from providing mechanical support and hire of plant to large projects, to delivering civil projects as a tier one contractor. Our Construction and Projects Managers have an extensive collaborative history of WA Civil Projects and we draw on this experience daily. Humble to our roots, we still offer wet and dry plant hire alongside of our civil works and have a team of highly trained operators and low hour, well maintained, equipment to support the business. To complement our diversified business, we have a team of Trainers and Assessors to ensure our crew is kept up to date with tickets and industry standards. Our TAAs are also available for external nationally accredited training and VOC's across WA.

Prequalifications, certifications, specialised capabilities: ISO 14001:2015 AS/ NZS 4801:2001 ISO 9001:2015. Main Roads accredited for heavy haulage within WA. Dozers, graders and excavators are equipped with Trimble GPS (can be removed if not a requirement). Civil Construction. Plant Hire. Heavy Haulage. Training.

VERSATILE PLANT HIRE & CONTRACTING

www.vphc.com.au

11 Broadwood St, Kalgoorlie WA 6430
PO Box 10437, Kalgoorlie PO, WA 6433

Phil Yates, Managing Director

Phone: 08 6558 1259

Email: admin@vphc.com.au

Versatile Plant Hire began in 2010 aiming to provide a high quality earthmoving and excavation plant hire service for mine sites around the WA Goldfields. We added Contracting to the name in 2014 to better reflect the 'planning-execution-completion' project work we were regularly handling for our clients. Our range of machinery enables us to tackle small to medium earthmoving projects such as clearing and rehab for exploration drilling programmes, dam, turkey nest and pond construction, pipeline containment v-drains and site preparation and decommissioning earthworks. Our highly mobile machinery allows accurate work with a minimal footprint as well as the flexibility to move rapidly between varying jobs over large areas. With a background in mining and haulage management and a passion for the environment, we understand the importance and relevance of the work we perform for our clients. We enjoy building relationships and pride ourselves on our good reputation and excellent track record.

Our pledge is to establish lasting relationships with our customers by exceeding their expectations and gaining their trust through exceptional performance and promoting a positive relationship between the client and every member of the Young's Earthmoving team. We are committed to industry best practice in occupational health, safety and environmental management. Our operators are highly skilled and through utilising late model plant and equipment we deliver an exceptional service.

Prequalifications, certifications, specialised capabilities: Young's Earthmoving specialises in bulk earthmoving, road construction and maintenance, airstrip construction, drainage structures, flood mitigation, mining exploration and rehabilitation, tailing dams, camps development, material haulage and heavy plant movements.
